

Iconic Spyglass Armwarmers

Frequently Asked Questions

What are armwarmers?

Armwarmers are handy layering sleeves to keep your arms warm when temperatures vary and you prefer to wear a short sleeve shirt for the warmer part of your activities.

Why armwarmers for golf?

Popular with cyclists, they are perfect for cool morning rounds which warm up by the turn or late rounds which turn chilly by the last few holes. The best armwarmers for golf are also UV protective, with resilient stretch, perspiration-wicking, anti-microbial/anti-odor properties for enhanced comfort and are machine washable.

Why iconic™ armwarmers? Why not just use cycling armwarmers?

Because Iconic Spyglass armwarmers work better for golf!

We use a fine gage, very fine denier microfiber fabric which is warm but lightweight with resilient stretch so it doesn't impede your swing or get baggy. Cyclists don't move their arms as much so this is not a factor for them and many cycling armwarmers are stiff.

Our armwarmers are inherently UV protective at the highest available rating, UPF 50+, for over 98% blockage of UVA and UVB rays that won't wash off or wash out – your dermatologist will love it. They are very comfortable with a great feel and wick perspiration, inhibit odor (anti-microbial). Plus they're machine washable and easy to keep tucked in your bag for unpredictable weather. Great for other outdoor activities as well... We have some great colors and you'll love our cool tone-on-tone iconic embroidery.

What sizes are available? What size should I wear?

Our armwarmers are in unisex sizes XS to XXL. The top of the sleeve should be worn in the narrower part of your upper arm above the bicep. Pick the size which fits snugly at the top but is comfortable while swinging, typically this will be your shirt size plus or minus one size. We suggest that any extra length be gathered at the wrist to avoid wrinkling at the elbow or upper arm.

I love them! What other UPF 50+ sun protection products does Iconic™ offer?

For UPF 50+ UV protection in hot weather, try our **unisex del Sol SunSleeves™** and **unisex del Sol SunDickie™** with the same great features in an untralightweight jersey. Available in solids and prints which coordinate with our apparel collection. For hot weather coverage of arms and shoulders, try our **new women's del Sol SunShrug™** and **del Sol SunCardigan™** to wear over sleeveless and cap sleeve tops as a twinset. Available in the same great fabrics and coordinating prints as our del Sol SunSleeves.
